Deputy State Budget Officer

The North Carolina State Government Statistical Abstract has been compiled by the North Carolina State Data Center, a unit of the Research and Planning Services Section. Mary Lou Stewart directed the project with the assistance of Lila Rash, John McIntyre, Johnny Johnson and Susan Narron. Additional input, review and assistance was provided by Francine Ewing, State Data Center Manager. Typing was provided by Karen Harris, Nancy Horton, and Janie Johnson.

The majority of the charting has been prepared utilizing SAS graphics and John McIntyre was responsible for the developmental and computing phase of the graphs, which were plotted by Land Resources Information Services (LRIS).

Additional copies of this document may be obtained by writing the Librarian, Office of State Budget and Management, 116 West Jones Street, Raleigh, North Carolina 27611. Cost per copy: $15.00 plus tax (Tax rate: Wake County - 4%; all other counties in North Carolina - 3%; out of State orders - no tax). Make checks payable to Office of State Budget and Management; No COD or Invoice Billing accepted.

PREFACE

Information provides the foundation on which planning, decision making, and subsequent evaluation is made at all levels within our State. Over the last decade North Carolina, as with most states, has experienced significant growth in the volume of data collected and disseminated to information users. Substantial resources in terms of both staff time and processing costs have been expended to make these data available. This fifth edition of the *North Carolina State Government Statistical Abstract* is presented to provide a comprehensive overview and convenient source document for statistical data regarding the conditions in the State, its governmental programs, and its services. The contents reflect the most widely requested and disseminated information pertinent to North Carolina and its component areas.

Due to the inherent selectivity of the data presented in the *Abstract*, a supplementary document, the *North Carolina State Government Statistical Register* (previously titled the *Statistical Guide*) will be published under separate cover in mid 1984. The objective of the *Guide* or *Register* is to provide a comprehensive inventory of statistical data generated or primarily disseminated by North Carolina State Government agencies. The *Register*, as opposed to the *Guide*, will also serve as the official listing of data required by state agencies for local federal grant recipients.

We wish to acknowledge the cooperation and assistance of many State agencies in the production of the *Abstract* through their recommendations and submission of data series identified to be of primary interest to a broad range of users. It is our hope that the *Abstract* will facilitate interagency statistical coordination and minimize the resources required to compile statistics about North Carolina.

INTRODUCTION

The North Carolina State Government Statistical Abstract assembles in a single reference document a wide range of statistical data specific to North Carolina generated primarily by State and Federal governmental agencies and some private firms. The information has been assembled into twelve major categories: Population and Housing; Vital Statistics and Health; Social and Human Services; Education; Law Enforcement, Courts and Corrections; Environment, Recreation and Resources; Energy and Utilities; State and Local Government Finances and Elections; Employment and Income; Business and Industry; Agriculture; and Transportation. The specific contents of these categories are reflected in the table and figure listings beginning on page vii. Series have been selected for inclusion based on their demand and utilization by a broad range of users. In many cases state summary data have been displayed because more detailed stratifications would be too voluminous. For determining the availability of more detailed data regarding a specific subject, the user should consult the North Carolina State Government Statistical Guide, soon to be updated as the Statistical Register, which inventories statistical information generated or primarily disseminated by state government agencies.

The State Rankings table has been included to facilitate comparisons among the fifty states for selected series. General footnotes and other explanatory information for the Abstract may help clarify and assist in interpretation of the data. A glossary of terms has been included at the beginning of each major section to define specific terms and concepts referenced in the tables. For additional information, users should contact the agency indicated in the appropriate source notation.

Comments and suggestions for additions to the Abstract will be gratefully received. This input will be used to plan for improvements and expansions to future editions. Comments may be directed to the North Carolina State Data Center, Office of State Budget and Management, 116 West Jones Street, Raleigh, North Carolina 27611 (Telephone 919 - 733-7061).

Metropolitan Statistical Areas (MSA's)
as defined June, 1983

METROPOLITAN STATISTICAL AREAS: NORTH CAROLINA

A Metropolitan Statistical Area is a geographic area containing a large population center surrounded by adjacent communities having strong economic and social ties to that center. The major purpose of MSA's is to allow federal statistical agencies to use common geographic definitions in the study of metropolitan characteristics, and to make data available for those individual areas on population, housing, industry, employment, payrolls and labor markets.

The Federal Committee on MSA's establishes detailed standards to be met in defining MSA's. According to these standards, an area can be eligible for recognition as an MSA if it has a city of at least 50,000 population or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. MSA's include entire counties (except in the six New England states where they include cities and towns). An MSA may also include additional counties having a strong economic and social relationship to the central county.

The number of Metropolitan Statistical Areas (MSA's) in North Carolina was reduced by the federal budget office from eleven in 1980 to nine in 1983. The Charlotte-Gastonia MSA was expanded to include two former MSA's, Salisbury-Concord and Rock Hill (South Carolina), plus Lincoln County. In addition to the Charlotte-Gastonia change, Currituck County was deleted from the Norfolk-Virginia Beach-Newport News, VA MSA, which is now the Norfolk-Virginia Beach-Newport News, VA MSA. Also Brunswick County was deleted from the Wilmington MSA, and Madison County was removed from the Asheville MSA. Besides Lincoln and York County (S.C.), other new metropolitan counties in 1983 were Davie, Burke and Franklin.

All North Carolina metropolitan areas are listed below both as they were defined in 1980 and in 1983. Any 1980 census data for metropolitan areas presented in this publication reflect metropolitan boundaries as of 1980.

NORTH CAROLINA COUNTIES AND THEIR RESPECTIVE MULTI-COUNTY PLANNING REGIONS

Because of a variety of private and public planning and development organizations in various geographical and political subdivisions of the State, a need for some type of uniform system of multi-county regions for planning and development activities was recognized.

The 1969 General Assembly enacted legislation defining a function of the N. C. Department of Administration as that of working cooperatively with counties, cities, and towns, and federal government, multi-state commissions and private agencies and organizations, in developing a system of multi-county planning regions to cover the entire State.

The following factors were used in reaching a tentative decision about where boundaries should be established:

1. The economic and social interrelationships between urban centers and the surrounding areas,
2. Existing cooperative programs among counties and municipalities,
3. At least three counties in each region,
4. A population base of at least 100,000 people in each region, and
5. The existence of mountain ranges or rivers that might separate one region from another.

Establishment of these regional boundaries was achieved by a coordinated effort of people from all levels of government.

Following is an alphabetical listing of North Carolina's 100 counties, designating their respective planning regions:

Population and Housing

POPULATION AND HOUSING

GLOSSARY

CENSUS DESIGNATED PLACE - Communities that can be identified locally by a place name and are characterized by a densely settled population center. Typically, they have no legally defined limits or corporate powers.

CONTRACT RENT - The monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included.

FARM - 1970 DEFINITION - The farm population comprises all persons living on farms. A farm consists of a rural place of 10 or more acres from which sales of farm products amounted to $50 or more in the preceding calendar year, or a rural place of less than 10 acres from which sales of farm products amounted to $250 or more in the preceding year.

- 1980 DEFINITION - The farm population is defined as persons living in rural territory on places from which $1,000 or more of farm products were sold in 1979.

GROSS RENT - The contract rent plus the estimated average monthly cost of utilities and fuels if these are paid for by the renter in addition to rent.

HOUSEHOLD - 1970 DEFINITION - A household includes all the persons who occupy a group of rooms or a single room which constitutes a housing unit. A group of rooms or single room is regarded as a housing unit when it is occupied as separate living quarters, that is, when the occupants do not live and eat with any other persons in the structure, and when there is either (1) direct access from the outside of the building or through a common hall or (2) complete kitchen facilities for the exclusive use of the occupants of the household. (Also see persons per household.)

- 1980 DEFINITION - The requirement of complete kitchen facilities, provided there is not direct access, has been dropped. Thus, the room or group of rooms must be occupied as separate living quarters and must have direct access.

PERSONS PER HOUSEHOLD - Is obtained by dividing the population in households by the number of households.

PLUMBING FACILITIES - 1970 DEFINITION - Complete plumbing facilities includes hot and cold piped water inside the structure as well as flush toilet and a bathtub or shower inside the structure for the exclusive use of the occupants of the unit.

- 1980 DEFINITION - For 1980, these facilities must be located not only inside the structure, but also inside the respondents living quarters.

POPULATION - Total permanent resident population including institutions and military installations. College students are considered residents of the community in which they reside while attending college. Persons in the Armed Forces and quartered on military installations are considered residents of the community in which their installations are located.

RURAL - The population not classified as urban constitutes the rural population. The rural population is subdivided into the rural--farm population, which comprises all rural residents living on farms, and the rural--nonfarm population, which comprises the remaining rural population.

SUBSTANDARD HOUSING - Although there is no official definition of substandard housing, it is often considered to be those units which are either overcrowded or have incomplete plumbing or both. This total may be calculated as the sum of all overcrowded units and all units with incomplete plumbing, less those units that have both conditions.

URBAN - The urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas.

(a) Reflects corrections since publication of Census printed reports.

(b) Total has been revised; however, revised data are unavailable by race. Between 1970 and 1980 differences in race classification occurred which served to decrease the category "white" and increase the category "nonwhite". Also, in censuses before 1980, enumerator judgement was often used to categorize race.

(a) The definitions for race were changed in the 1980 census, which resulted in fewer "whites" and more "nonwhites" than by the 1970 definitions.

(b) Total for 1980 has been revised; however, revised data are unavailable by race.

Net Migration to N.C. = 87,244

(a) Data on residence in 1975 are based on approximately one-half of the full census sample. Therefore, figures in tabulations involving residence in 1975 may differ from tabulations based on the full sample.

NOTE: Not included above are 43,909 immigrants coming from abroad. Data on the number of out-migrants going abroad are not available.

(a) These are complete count data from both censuses. Any corrections to published census information are not shown.

(b) For purposes of this table, "Overcrowding" is defined as 1.01 or more persons per room.

(c) The median value is tabulated only for one-family houses on less than 10 acres without a commercial establishment or medical office on the property, and also includes the price asked for vacant-for-sale units.

(d) Contract rent is tabulated for occupied units rented for cash and vacant units for rent. Excluded are rented one-family houses on 10 acres or more. Contract rent is the monthly rent contracted for, regardless of any furnishings, utilities, or services that may be included. (Gross rent is the sum of contract rent and utility costs.) Negative signs following rent figures mean that the median is less than the amount shown.

Section 2

Vital Statistics and Health

VITAL STATISTICS AND HEALTH

GLOSSARY

COMMUNICABLE DISEASES - Those notifiable diseases which were reported to the Division of Health Services.

DEATH - The permanent disappearance of any evidence of life at any time after live birth.

FETAL DEATH - Death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, as indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

GENERAL FERTILITY RATE - The number of births per 1,000 women of childbearing age (15-44).

GESTATION - Weeks of pregnancy as computed from date of last menstrual period.

HOMES FOR THE AGED (DOMICILIARY CARE) - Facilities that provide personal care services but are not required to provide nursing care.

INCIDENCE RATES - The number of injuries and illnesses or lost workdays per 100 full-time workers.

INDUCED ABORTIONS - The purposeful interruption of pregnancy with the intention other than to produce a liveborn infant or to remove a dead fetus and which does not result in a live birth.

INFANT DEATH - Death of a liveborn infant under one year of age.

INTERMEDIATE CARE - Facilities that offer a level of care less than that offered in a skilled care facility, but more than that offered in a domiciliary care facility. These facilities must provide licensed nursing coverage eight hours a day, seven days a week, preferably during daylight hours.

LIVE BIRTH - The complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or any definite movement of voluntary muscles whether or not the umbilical cord has been cut or the placenta is attached.

LOST WORKDAY CASES - Those cases which involved one or more lost workdays away from work and therefore, may include cases which involved both days away from work and days of restricted work activity.

LOST WORKDAYS - The number of workdays (consecutive or not) on which the employee would have worked but could not because of occupational injury or illness.

MORBIDITY RATE - The number of reported cases of a notifiable disease per 100,000 population.

NEONATAL DEATH - Death of a liveborn child under 28 days of age.

OCCUPATIONAL ILLNESS - Any abnormal condition or disorder, other than one resulting from an occupational injury, caused by exposure to environmental factors associated with employment. It includes acute and chronic illnesses or diseases which may be caused by inhalation, absorbtion, ingestion, or direct contact.

OCCUPATIONAL INJURY - Any injury such as a cut, fracture, sprain, amputation, etc., which results from a work accident or from an exposure involving a single incident in the work environment.

POSTNEONATAL DEATH - Death of an infant 28 days and over but less than 1 year of age.

RESIDENCE ALLOCATION - Vital events in these tables are allocated to the place of residence (county) regardless of the place of occurrence. In the case of a birth, residence is the usual residence of the mother. Deaths are allocated to the residence of the deceased. Cases of communicable diseases are allocated to the patients county of residence.

SKILLED CARE - Facilities offering a level of care less than that offered in an acute care hospital, but more than that offered in an intermediate care facility. These facilities must provide licensed nursing coverage 24 hours a day, seven days a week.

TOTAL FERTILITY RATE - The sum of the age-specific birth rates over all ages of childbearing. The total number of children a woman would bear during her childbearing years, if the current age-specific birth rates continued at their current rates.

(a) Industry totals may include data for industries not shown separately.

(b) Because of rounding, the sum rates for lost workday cases and cases without lost workdays may not equal the total. The difference between the total and the sum of the components shown may, therefore, not reflect the fatality rate.

NOTE: See glossary for definitions of the headings.

SOCIAL AND HUMAN SERVICES

GLOSSARY

AA (Aid to the Aged) - See State/County Special Assistance.

AD (Aid to the Disabled) - See State/County Special Assistance.

AFDC (Aid to Families with Dependent Children) - Financial assistance available to families with children who are deprived of parental care or support due to the absence or incapacity of one or both parents. Payments are based on the difference between income available to the family and the total allowance established under the Consolidated Standard of Need for food, clothing, shelter, utilities, household furnishing, equipment and supplies, personal expenses, medicine (other than prescription drugs), certain school fees, and transportation costs for the members in the budget unit.

CHILD SUPPORT ENFORCEMENT - A program of assistance in locating absent parents of AFDC children and of establishing paternity and support obligations for families in which there is an absent parent responsible for support of children. The program also provides for the collection and distribution of support payments.

CHILD WELFARE SERVICES - Services which supplement or substitute for parental care and supervision including protective services to abused and neglected children; placement in foster care, adoption or day care; delinquency prevention services; and services to strengthen the child's own home where possible. These are provided on the basis of the child or family's need for the service without regard to financial need criteria.

COUNTY FINANCIAL ASSISTANCE - An emergency type of assistance paid entirely by county funds and consisting of two categories: (1) General Assistance - funds expended for food, clothing, utilities, etc.; payments for domiciliary care for persons not eligible for SSI or State/County Special Assistance and (2) Other Financial Assistance - funds expended for Medical care and hospitalization other than Medicaid, boarding home care for children, burials, etc.

FOOD STAMP PROGRAM - A federal, state and local program designed to provide individuals meeting certain income eligibility standards set by the federal government with coupons for food through purchase or as a reduction from their assistance payment. The purchase price of the coupons is less than the dollar value of the goods they can purchase.

MEDICAID - An assistance program that provides Medical services for certain needy and medically indigent persons. Persons eligible include those who qualify to receive a money payment under the public assistance program and others who meet certain income constraints but do not qualify or elect to receive financial assistance for living expenses.

MEDICARE - A federal hospital and medical insurance protection plan enacted in 1965 under the Social Security program. The program was designed to cover persons 65 and over and has been expanded to include persons under 65 who have been entitled to disability checks for 2 or more consecutive years and persons with permanent kidney failure who need dialysis or kidney transplants.

PUBLIC ASSISTANCE - Aid provided to the needy, aged, blind, disabled and families of dependent children under federal and state programs.

SOCIAL SECURITY - A U.S. government program designed to provide continuing income when the individual or family earnings are reduced or stopped because of retirement, disability or death. The program was established in 1935 covering only the worker at retirement but has been gradually extended to include provisions for old age and survivors insurance, contributions to state unemployment insurance, and old age assistance.

STATE/COUNTY SPECIAL ASSISTANCE - A state and local program designed to provide support to the aged (Aid to the Aged) and disabled (Aid to the Disabled) beyond the federal Supplemental Security Income (SSI) payments or coverage in order to meet their needs for special care. On January 1, 1974, the Supplemental Security Income program was implemented as a result of amendments to the Social Security Act. This program replaced the former federal grants made to the states for Aid to the Aged, Disabled and Blind and made the administration of these payments the responsibility of the Social Security Administration. In order to prevent any persons from receiving less money under the new program, the states are required to provide supplementary payments to make up any deficits between the old amount and the new amount for all persons on the rolls as of December 31, 1973. No provision was made; however, for those persons added to the rolls on or after January 1, 1974. North Carolina's supplementary program (State/County Special Assistance) was set up for the dual purpose of complying with Federal legislation and compensating for the failure of the Federal program to make provisions for the special needs of the Aged and Disabled; specifically Domiciliary Care, Chore Services, Needy Spouses/Essential persons, and Certain Disabled Persons not covered by SSI.

VOCATIONAL REHABILITATION SERVICES - A state and federal program designed to help those with mental or physical disabilities and those with handicaps to become more employable and get jobs. Services include eligbility determination, designing vocational rehabilitation programs, placing clients in jobs and following up programs after employment.

WORK DISABILITY - A health condition (physical or mental) which lasts 6 or more months and which limits the kind or amount of work a person could do at a job.

WORK INCENTIVE PROGRAM (WIN) - A program administered by local departments of social services and employment security offices with the purpose of providing training and appropriate services to enable public assistance recipients to become employable.

(a) Federal funding for the WIN program was drastically reduced effective February 1, 1982. Therefore, the number of counties involved in the program was reduced from 45 to 6 thus causing the number of grants reduced/terminated and the savings to drop to 2,967 and $438,665, respectively. The last two quarters of 1982 were estimated based on the corresponding quarters for the prior year, due to problems with unavailable data in conversion of the computer system (effective July 1, 1982).

NOTE: A dash (-) indicates the county did not have a WIN program in that year.

Education

EDUCATION

GLOSSARY

PUBLIC SCHOOLS

AVERAGE DAILY ATTENDANCE (ADA) - The average number of students present per day.

AVERAGE DAILY MEMBERSHIP (ADM) - The average number of students enrolled per day.

EXCEPTIONAL CHILDREN - Full-time and part-time students served in an exceptional pupil program which includes autistic, deaf/blind, educable mentally handicapped, gifted and talented, hearing impaired, multi-handicapped, other health impaired, physically/orthopedically handicapped, pregnant, seriously emotionally handicapped, specific learning disabled, speech-language impaired, severely/profoundly mentally handicapped, trainable mentally handicapped, and visually impaired.

FINAL ENROLLMENT - Enrollment at beginning of the school year plus new enrollments from a non-public school or another state. Withdrawals are not subtracted from the enrollment figures.

HIGH SCHOOL DROPOUTS - The difference between the size of the graduating class when they were in the ninth grade and their class size upon graduation, allowing for the average annual combined effect of in-and-out migration, public and private school transfers, changes in nonpromotion patterns, and student deaths. The estimated annual high school dropout rate is calculated by dividing the number of dropouts by the high school enrollment.

COMMUNITY COLLEGE SYSTEM

ACADEMIC CURRICULUM PROGRAMS - Include College Transfer and General Education curriculum programs.

ACADEMIC EDUCATION EXTENSION PROGRAMS - Consist of short courses developed to serve the general academic needs and interests of the adult population in the community.

COLLEGE TRANSFER EDUCATION PROGRAMS - Consist of planned academic curricular programs of at least 96 quarter hours of credit leading to an Associate in Arts or Associate in Science degree and designed to allow for transfer to the junior year of a senior institution.

COMMUNITY COLLEGE SYSTEM - Includes 6 technical institutes, 29 technical colleges and 23 community colleges.

CURRICULUM PROGRAMS - Include College Transfer, General Education, Technical, and Vocational programs. Special Credit Students are also included in curriculum enrollment.

EXTENSION PROGRAMS - Include Adult Basic Education, CETA (Comprehensive Employment Training Act), New Industry, and Self-supporting Recreational programs in addition to the Regular Budget Extension program areas of Occupational Extension, Adult High School, and Academic Extension.

FULL-TIME EQUIVALENT (FTE) - A student in membership for 16 hours of class, shop, or lab per week for 44 weeks, the full four-quarter school year. Average Annual FTE is the average FTE of the four quarters of summer, fall, winter, and spring for a given year.

FUNDAMENTAL EDUCATION EXTENSION PROGRAMS - Include Adult Basic Education, Adult High School, and Learning Laboratory.

GENERAL EDUCATION CURRICULUM PROGRAMS - Consist of basic course work in English, literature, fine arts, philosophy, social science, science, and mathematics. They are designed principally for students who desire two years of general education beyond the high school level. Successful completion of 96 quarter hours of credit leads to an Associate Degree in General Education. Fewer hours are required for the Certificate in General Education.

OCCUPATIONAL CURRICULUM PROGRAMS - Include Technical and Vocational programs.

OCCUPATIONAL EXTENSION PROGRAMS - Consist of single courses each complete in itself, designed for the specific purposes of training an individual for employment, upgrading the skills of persons presently employed, and retraining others for a new employment in occupational fields.

POST-SECONDARY INSTITUTIONS - Institutitions of learning beyond high school.

RECREATION EXTENSION PROGRAMS - Those programs and activities which the institution may provide at the request of the community but for which the institution receives no budgetary credit. The cost of such activities are borne exclusively by the participants or some contracting agency.

REGULAR BUDGET PROGRAMS - Include all programs in the Curriculum (College Transfer, General Education, Technical, and Vocational) and Regular Budget Extension areas (Occupational Extension, Adult High School, and Academic Extension programs). It does not include Learning Lab, Adult Basic Education, CETA, New Industry, or Self-supporting Recreational classes.

SPECIAL CREDIT STUDENTS - Those students who take one or more single courses for credit but who are enrolled in a regular curriculum program.

TECHNICAL EDUCATION CURRICULUM PROGRAMS - Designed to prepare individuals for employment. Completion of the curriculum leads to an Associate in Applied Science degree. The programs are generally two academic years in length, although some take longer to complete.

UNDUPLICATED HEADCOUNT - The number of individuals enrolled in each curriculum or extension program. A student is counted in only one curriculum. In extension a student is counted in each extension program in which he is enrolled, but he is counted only once in the total regardless of the number of different programs in which he is enrolled. Because of this method of counting the extension enrollment, the sum of the enrollments in each program exceeds the total unduplicated extension count.

VOCATIONAL EDUCATION CURRICULUM PROGRAMS - Consist of a series of courses which are designed to prepare an individual for employment in a specific occupation. These programs consist of a sequence of courses which generally can be completed in one year or less by a full-time student. Successful completion of a vocational curriculum program leads to a diploma or certificate.

HIGHER EDUCATION

BACHELOR'S DEGREE - Requires successful completion of at least four but not more than five years of academic work.

DOCTOR'S DEGREE - Includes such degrees as Doctor of Education, Doctor of Juridical Science (S.J.D.), Doctor of Public Health, and the Doctor of Philosophy in any field.

ENROLLMENT - Refers to the headcount resident-credit enrollment. The resident-credit enrollment includes full-time and part-time students enrolled in courses basic to or creditable to a bachelor's or higher degree. This excludes students in extension, correspondence, adult education, audited courses, short courses, and those enrolled for individual lessons only.

ENTERING FRESHMAN ENROLLMENT - Includes new students who have no college credits prior to the immediately previous summer sessions.

FACULTY - Refers to the professional personnel employed in colleges and universities who are primarily assigned to resident instruction and departmental or organized research. This does not include other professional personnel in library, auxiliary enterprises, and public service activities.

FIRST PROFESSIONAL DEGREE - Signifies the completion of the academic requirements for a selected profession, which is based on an educational program requiring at least two academic years of previous college work for entrance and which requires a total of at least six academic years of college work for completion. Examples of first professional degrees are the Doctor of Jurisprudence (J.D.) and Bachelor of Laws (L.L.B.), Doctor of Dental Surgery (D.D.S.), and Doctor of Medicine (M.D.) degrees.

FULL-TIME EQUIVALENT (FTE) OF PART-TIME STUDENTS:

Undergraduates	FTE	Graduate Students	FTE
12 credit hours or more =	1	9 credit hours or more =	1
9 to 12 credit hours =	3/4	6 to 9 credit hours =	3/4
6 to 9 credit hours =	1/2	3 to 6 credit hours =	1/2
Less than 6 credit hours =	1/4	Less than 3 credit hours =	1/4

FULL-TIME STUDENT - Includes students registered for 12 or more credit hours as undergraduates or 9 or more credit hours as graduates.

GRADUATE ENROLLMENT - Includes students who have attained at least one standard bachelor's degree or first professional and who are or might be candidates for a master's or doctor's degree.

MASTER'S DEGREE - Is customarily granted upon successful completion of one (sometimes two) academic years of work beyond the bachelor's degree.

PART-TIME STUDENT - Includes students registered for less than the required full-time load (see Full-Time Student).

POST-SECONDARY INSTITUTIONS - Institutions of learning beyond high school.

TRANSFER - Refers to students transferring to North Carolina institutions who have college credits from other institutions in a previous regular session(s). A former student transferring back to his original institution after attendance at another institution is not classified as a transfer.

UNDERGRADUATE ENROLLMENT - Includes students who have not completed a full four-year program or its equivalent and also students in a five-year bachelor's program. This classification includes students in junior and community colleges in programs transferable to four-year institutions.

Section 5

Law Enforcement, Courts, and Corrections

LAW ENFORCEMENT, COURTS, AND CORRECTIONS

GLOSSARY

AGGRAVATED ASSAULT - An unlawful attack by one person upon another for the purpose of inflicting severe bodily injury.

ASSIGNED PRIVATE COUNSEL - The State provides legal counsel for indigent persons in a variety of actions and proceedings. These include criminal proceedings, judicial hospitalization proceedings, juvenile proceedings that may result in commitment to an institution or transfer to superior court for trial as an adult. Legal representation for indigents may be by assignment of private counsel, by assignment of special public counsel (involving mental hospital commitments), or by assignment of a guardian ad litem for juveniles.

BURGLARY - The unlawful entry of a structure to commit a felony or theft, even though no force was used to gain entry.

COMMUTATION - Reduction in the severity of a sentence (usually reduction in the length of a prison term); reserved to the Governor by the State Constitution.

CONDITIONAL RELEASE - Parole for a Committed Youthful Offender (CYO), that is, a person under 21 years of age sentenced by a trial judge under the Youthful Offender law.

CRIME INDEX - The sum total of seven major offenses used to measure the extent, fluctuation, and distribution of crime in a given geographical area. Crime classification presently used in the index are: 1) murder, 2) forcible rape, 3) robbery, 4) aggravated assault, 5) burglary, 6) larceny, and 7) motor vehicle theft. NOTE that although arson is considered an index crime, the number of these offenses reported does not now constitute part of the crime index in North Carolina.

GUARDIAN AD LITEM - The state provides a guardian ad litem for children alleged in juvenile petitions to be abused or neglected. By statute the guardian ad litem is a licensed attorney and is compensated for his services in the same way as compensation is provided for representation of an indigent.

INDIGENT - A person is determined to be indigent if he is found "financially unable to secure legal representation." He is entitled to State-paid legal representation in: any proceeding which may result in (or which seeks relief from) confinement, a fine of $500 or more, or extradition to another state, a proceeding alleging mental illness or incapacity which may result in confinement, transfer to superior court for a felony trial, or a transfer of custody upon a finding of neglect.

JUVENILE - For purposes of juvenile jurisdiction of the district courts, a juvenile or "child" is defined as being, with two exceptions, one who has not reached his or her eighteenth birthday and "is not married, emancipated, or a member of the armed services of the United States." The exceptions are where a person has committed, or is alleged to have committed, a criminal offense, including violations of the motor vehicle laws; or has violated the conditions of probation previously ordered in a court proceeding. For these latter situations, the statutes provide that a juvenile or child is one who has not reached his or her sixteenth birthday.

LARCENY - The unlawful taking or stealing of property or articles of value without the use of force, violence or fraud.

PARDON - Forgiveness of a criminal act, including remission of any penalty not yet paid; reserved to the Governor by the State Constitution; the Governor may specify conditions if he so desires; subject to revocation if the conditions are breached.

PAROLE - Release from prison before completion of sentence by the Parole Commission; subject to specified conditions, usually including supervision by an appointed authority; subject to revocation and imprisonment if the conditions are breached.

PROBATION - Permission by the trial judge, upon suspension of an active prison sentence, to go at large, subject to specific conditions imposed, usually including supervision by an appointed authority; subject to revocation and the activation of the suspended sentence if the conditions are breached.

PUBLIC DEFENDER - There are six public defenders in North Carolina (serving Judicial Districts 3, 12, 18, 26, 27, and 28) who provide legal representation for persons determined to be indigent. In unusual circumstances, such as the existence of a conflict of interests, an indigent in one of these districts may be represented by private counsel, appointed by the court and paid a fee for his legal services by the State; in the other 26 districts this assigned private counsel system is the only one employed.

REPRIEVE - Delay or halt in the execution of a sentence; can be granted by a court or the Governor.

ROBBERY - Occurs in the presence of the victim to obtain property or a thing of value from a person by use of force or threat of force.

SERIOUS CRIME - Murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary - breaking and entering, larceny, and motor vehicle theft. These offenses, which are counted as they become known to the law enforcement agencies, make up a Crime Index which can be used to indicate the probable extent, fluctuations, and distribution of crime.

(a) Figures for first half of 1979.

(b) High Risk Releases are those who were unmarried with one or more rule violations and prior prison convictions; were under 21 years of age; had less than 10 years schooling; and whose crime was not assaultive.

(c) Low Risk Releases are those who were married; had no rule violations or prior prison convictions; were over 25 years old; and had at least 12 years of education. (There was no restriction on crime type for this group.)

NOTE: Returns may be due to parole revocation or conviction of a new crime.

Environment, Recreation and Resources

ENVIRONMENT, RECREATION, AND RESOURCES

GLOSSARY

AIR QUALITY CONTROL REGION - Pursuant to the provisions of the Clean Air Act of 1970, the entire area of N. C. is included in eight (8) air quality control regions in accordance with the recommendations of the State. Those recommendations were based on consideration of the following factors: Multi-county planning region boundaries, air pollution sources and receptors, present and future conditions, unified and cooperative governmental administration of the air resources, topography, population, and land use and industrial development.

AIR POLLUTANT AREA SOURCE - Includes homes and residential areas.

AIR POLLUTANT POINT SOURCE - A stationary area which emits more than 25 tons (of a particular pollutant) per year.

CROPLAND - Land used for all row crops, close-grown field crops, rotation hay and pasture, hayland, conservation use only (excluding forest land), temporarily idle, orchards, vineyards, bush fruit, and open land formerly cropped.

FEDERAL LAND - Federally-owned land, except that federally-owned cropland operated under lease or permit is excluded.

FOREST LAND

COMMERCIAL FOREST - Land which is at least 10 percent stocked by forest trees of any size or formerly having had at least 10 percent stocking and not currently developed for a non-forest use and which is:

(a) Producing, or capable of producing, crops of industrial wood. Includes both accessible and inaccessible area and cutover areas on which timber species have not been reestablished and which have not been developed for non-forest use at the time of inspection.

(b) Not withdrawn from timber use by statute or administrative regulation.

(c) Suitable for management to grow crops of industrial wood.

(d) Capable of producing at least 20 cubic feet of industrial wood per acre per year (timber species may not have been on area at time of inventory).

NON-COMMERCIAL FOREST - Forest land which is:

(a) Incapable of yielding crops of industrial wood because of adverse site conditions. Adverse site conditions include sterile or poorly drained forest land, subalpine areas, steep rocky areas, or pinon-juniper areas.

(b) Productive forest land withdrawn from commercial timber use through statute or administrative regulation.

GROUND WATER - Water withdrawn from below the surface (well water).

LARGE WATER - Water bodies of 40 or more acres (including sounds) and rivers, streams and canals more than 1/8 of a mile wide.

LIBRARY BOUND VOLUME - A bound volume is defined, for statistical purposes, as a physical unit of any printed, typewritten, handwritten, mimeographed, or processed work contained in one binding or portfolio, hardbound or paperbound, which has been classified, catalogued, or otherwise prepared for use. This includes bound periodical volumes and all nonperiodical government documents.

OTHER LAND - Other land in farms (farm roads, feed lots, etc.) and other land not in farms (dunes, rivers, etc.).

PASTURE - Lands producing forage plants, principally introduced species, for animal consumption. The land may contain shade or timber trees if the canopy is less than ten percent, but the principal plant cover is such as to identify its use as permanent grazing land.

SMALL WATER - Ponds and lakes of more than two acres but less than 40 acres, and rivers and streams less than 1/8 of a mile wide.

SURFACE WATER - Water withdrawn from surface impoundment, or reservoirs.

TOTAL AREA - An aggregate of all land use categories, including sounds.

PRIORITY BASED ON MAXIMUM POLLUTANT CONCENTRATION
BY POLLUTANT

Annual Geometric Mean	325	150-325	150
24-hour Maximum			

For carbon monoxide (CO), nitrogen dioxide (NO_2), and photochemical oxidants (O_3), each region will be classified into one of the two categories defined as Priority I or Priority III. Classification with respect to hydrocarbons will be the same as the classifications with respect to photochemical oxidants.

	Priority I Equal to or Above	Priority III Less Than Priority I
Carbon Monoxide (CO)	55 milligrams per cubic meter, 8-hour maximum	Below such value
Nitrogen Dioxide (NO_2)	An annual mean value of 110 micrograms per cubic meter.	Below such value.
Photochemical Oxidants (O_3)	195 micrograms per cubic meter, 1-hour maximum.	Below such value

Table 176

SOURCES OF AIR POLLUTION BY CLASSIFICATION

Sulfur Oxides (SO_2). Fuel burning operations are the single largest source category. Other significant sources of sulfur oxides emissions in North Carolina include sulfuric acid manufacturing and some miscellaneous industrial processes.

Particulate Matter. Sources of particulate matter include, among others, open burning, incineration, fuel combustion, a variety of industrial processes, and wind blown dust. The major source of particulate matter in N.C. is dust from dirt roads.

Carbon Monoxide (CO), Hydrocarbons , Photochemical Oxidants (O_3), and Nitrogen Dioxide (NO_2). Motor vehicles constitute the single largest source of these pollutants. However, there are certain stationary sources which emit one or more of these pollutants: Carbon monoxide and nitrogen dioxide from combustion sources, hydrocarbons resulting from the storage and use of volatile substances, and nitrogen dioxide from acid manufacturing plants. Vegetation is a significant, and perhaps the largest source of hydrocarbons in N.C.

Table 177

AMBIENT AIR QUALITY STANDARDS BY CLASSIFICATION

Sulfur Dioxide (SO_2). The ambient air quality standards for sulfur oxides measured as sulfur dioxide are:

1) 80 micrograms per cubic meter annual arithmetic mean.
2) 365 micrograms per cubic meter maximum 24-hour concentration not to be exceeded more than once per year.
3) 1300 micrograms per cubic meter maximum 3-hour concentration not to be exceeded more than once per year.

Suspended Particulates. The ambient air quality standards for suspended particulate matter are:

1) 75 micrograms per cubic meter annual geometric mean.
2) 235 micrograms per cubic meter maximum hourly concentration not to be exceeded more than one day per calendar year.

Carbon Monoxide (CO). The ambient air quality standards for carbon monoxide are:

1) 10 milligrams per cubic meter maximum 8-hour concentration not to be exceeded more than once a year.

2) 40 milligrams per cubic meter maximum 1-hour concentration not to be exceeded more than once per year.

Photochemical Oxidants (O_3). The ambient air quality standards for photochemical oxidents measured and corrected for interferences due to nitrogen oxides and sulfur dioxide is:

1) 160 micrograms per cubic meter maximum 1-hour concentration not to be exceeded more than once per year.

Hydrocarbons. The ambient air quality standard for hydrocarbons measured and corrected for methane is:

1) 160 micrograms per cubic meter maximum 3-hour concentration (6:00 to 9:00 a.m.) not to be exceeded more than once per year. This standard is a guide for us in devising plans to achieve oxidant standards.

Nitrogen Dioxide (NO_2). The ambient air quality standard for nitrogen dioxide is:

1) 100 micrograms per cubic meter annual arithmetic mean.

Lead. The ambient air quality standard for lead is:

1) 1.5 micrograms per cubic meter maximum arithmetic mean over a calendar quarter.

(a) Class I High Density Recreation Areas have intensive development and recreation activities such as group sports and are usually within or near major urban populations.

- A. Neighborhood Emphasis Areas have a primary service area consisting of a neighborhood. This category includes areas designated as Mini-parks, Playgrounds, Neighborhood Parks and combined Neighborhood Park-Playgrounds.
- B. Community Emphasis Areas have a primary service area consisting of a community or group of neighborhoods but are less than city-wide in scope of service. This category includes areas designated as Playfields and Community Parks.
- C. City Parks are large parks that provide diversified recreation opportunities for an entire city. A large city may have more than one area of this type.

Class II General Outdoor Recreation Areas are generally less intensive and more remote than Class I areas. Interesting and attractive setting for activities such as camping, nature walks and outdoor sports.

- A. District Parks are intensively developed parks located in rural settings and designed to provide a variety of indoor and outdoor recreation opportunities to rural residents.
- B. County Parks are extensively developed parks that are designed to serve the residents of several municipalities or a large rural area.
- C. Specialized Outdoor Recreation Areas with low intensity use (SORA Low) such as zoos, golf courses and boat access areas.
- D. Specialized Outdoor Recreation Areas with medium intensity use (SORA Medium) such as flower gardens, arboretums, campgrounds, ski resorts, amusement and novelty resorts.
- E. Specialized Outdoor Recreation Areas with high intensity use (SORA High) such as outdoor theatres, stadiums, agricultural fairs and sport centers.

Class III Natural Environment Areas offer weekend and vacation activities dependent on a natural setting such as nature study sightseeing, hunting and fishing. Light facility development, access, trails and campsites.

- A. III Specialized Outdoor Recreation Areas with low intensity use (III SORA Low) such as gamelands and agricultural land for hunting.
- B. State Parks provide outdoor recreation areas with emphasis on providing a quality natural environment within a one-hour drive of regional population centers. These areas are usually developed to an extent that only 5% to 10% of the surface area is for intensive human use with the remainder being maintained in a natural state.
- C. Destination Parks are large outdoor recreation areas that are remote from large urban centers of population and provide a wide range of extensive outdoor recreation opportunities. The primary service area for such parks might include a region of the nation consisting of several states, or it may include the entire nation.

Class IV Outstanding (Unique) Natural Areas have outstanding natural features that merit special attention and preservation. Activities are limited to those that preserve the setting. Minimum development outside the immediate area of the unique features.

Class V Wilderness Areas are wild and undeveloped areas removed from the effects of civilization. Activities are limited to those requiring a minimum of conveniences and equipment. No development of recreation facilities except trails.

Class VI Historic and Cultural Sites are sites associated with history, tradition or cultural heritage that merit preservation or restoration. Activities such as sightseeing and study of features. Development not to detract from the value of the site.

Energy and Utilities

ENERGY AND UTILITIES

GLOSSARY

BTU (BRITISH THERMAL UNIT) - The amount of heat necessary to raise the temperature of one pound of water one degree Fahrenheit.

COMMERCIAL - Includes wholesale and retail trade; finance, insurance and real estate; services; and public administration. End uses included (in commercial buildings) are space heating and cooling, lighting, cooking, refrigeration, and other appliances.

ELECTRIC MEMBERSHIP CORPORATION - Member-owned business which provide rural electric service to members of the corporation. The members are also stockholders. The Board of Directors is elected from the members.

GROSS ENERGY CONSUMPTION - The total of energy inputs into the economy, including coal, petroleum, natural gas, and the hydro and nuclear power used for electricity generation.

INDUSTRIAL - Includes mining, construction, and manufacturing. End uses included are space heating, space cooling, lighting, chemical feedstock, and industrial generation of electricity.

KILOWATT (kw) - The unit of power equal to 1,000 watts. Roughly the power of one kw is capable of raising the temperature of a pound (pint) of water one degree Fahrenheit in one second.

KILOWATT-HOUR (kwh) - The amount of work or energy delivered during the steady consumption of one kilowatt of power for a period of one hour.

NET ENERGY CONSUMPTION - The energy actually delivered to consumers in the form of petroleum products, natural gas, coal and electricity.

PEAK LOAD - Measure of power delivered at the time demand is maximum. Peak periods of power usage vary across the country mainly due to differing climatic conditions.

RESIDENTIAL - Includes all private households. End uses included are space heating and cooling, water heating, cooking, lighting, clothes drying, refrigeration, and other appliances.

THERM - A unit of heat energy, equal to 100,000 Btu's. There are 10.3 therms in 1,000 cubic feet of natural gas.

State and Local Government Finances and Elections

STATE AND LOCAL GOVERNMENT FINANCES AND ELECTIONS

GLOSSARY

ALCOHOLIC BEVERAGE TAX - Annual license taxes are imposed on manufacturing, bottling, or selling beer and wine. Excise taxes are levied on beer, wine, and spirituous liquors. Resident wholesalers and local alcoholic beverage control boards pay excise taxes on liquor.

ASSESSED VALUE - All property is assessed annually as of January 1, and is required to be assessed at 100 percent of appraisal value.

CAPITAL IMPROVEMENTS - Construction projects for state-owned facilities. Public school construction bonds and clean water bonds are not included.

EXCISE STAMP TAX ON CONVEYANCES - Imposed on transactions conveying an interest in real estate located in North Carolina. The following conveyances are exempt from the tax: operation of law; lease for a term of years; will, intestacy, or gift; merger or consolidation; instruments securing indebtedness; transfers by a governmental unit; and, transfers where no consideration in property or money is due or paid by the transferee to the transferor. The tax rate is 50 cents on each $500 or fraction thereof, of the value of the interest or property conveyed less any lien or encumbrance remaining on the interest or property at the time of sale.

GENERAL FUND - This fund is derived from income taxes, franchise taxes, sales taxes and other taxes of a general nature which are levied upon all segments of the population. General Fund monies support the major portion of all North Carolina State governmental activities.

GROSS RETAIL SALES - Total retail sales (taxable and non-taxable) reported to the North Carolina Department of Revenue by businesses for State sales and use tax purposes. Includes receipts from some services, for example, hotel and motel room rentals and laundry and dry cleaning services. Also includes receipts from rentals of tangible personal property.

HIGHWAY FUND - This fund is derived from taxes on gasoline and from the fees, and licenses assessed in connection with the operation of Motor Vehicles. Highway Fund monies are earmarked for highway maintenance and construction and for operation of the North Carolina Department of Motor Vehicles.

INTANGIBLE PERSONAL PROPERTY TAX - Includes taxes on money on deposit, money on hand, accounts receivable, notes, bonds, and other evidences of debt, shares of stock, beneficial interest in foreign trust, and funds on deposit with insurance companies.

NET EXPENDITURES - Eliminates inter/intra departmental transfers as well as inter/intra departmental sales and payments for services.

NON-TAX REVENUES - Revenue coming from a variety of sources including interest from the State Treasurer's investments, fees derived from regulatory functions, court costs and fees, and reversions of unspent capital improvement appropriations. Also includes the State's share of the intangible tax collections and the State's retained part (administrative costs) of the 1% local sales tax revenue collected by the State. Does not include federal aid.

OPERATING FUNDS - Includes funds required for day-to-day operations of a government. Trust funds, and depository accounts are not included.

SALES AND USE TAX - A 3 percent state tax rate is levied on the purchase price of all tangible goods sold to the final users not specifically exempt or subject to taxation at a reduced rate. Counties may levy an additional 1 1/2% sales and use tax on these same items. The use tax is collected from purchasers of goods from out-of-state for use in North Carolina. Certain services are also subject to the tax such as rental of tangible personal property, rental of rooms to transients, laundry and dry cleaning services, and burial services. A 2% tax rate is levied on the final sale price of motor vehicles, airplanes, boats, locomotives, and railway cars up to a maximum of $300. A 1% tax rate is levied on the final sale value of coal, coke, and fuel oil used in manufacturing or farming. Further, a 1% tax rate is levied on the final sale value of manufacturing machinery and farm machinery. Counties, municipalities, hospitals, educational institutions, churches, orphanages, and charitable and religious institutions not operating for a profit may obtain refunds of sales taxes paid.

SOFT DRINK TAX - A 1 cent per bottle or can is placed on soft drinks by use of crowns or stamps. Dry soft drink powders and base products which are used to make soft drinks without being converted into syrup are taxed at 1 cent per ounce. Soft drink syrups are taxed at $1 per gallon. All bottled soft drinks containing at least 35 percent natural fruit or vegetable juice, and all bottled natural liquid milk drinks containing at least 35 percent natural liquid milk are exempt. Exemptions also apply to concentrated natural fruit or vegetable juice, coffee, tea, and concentrated frozen juicies sold for home use. These exemptions do not apply to any fruit or vegetable juice drink to which any coloring, artificial flavoring, or preservatives have been added.

SPECIAL FUND - This fund includes Federal funds and special funds derived from fees or license sales relating to a particular field (for example, hunting and fishing), with such dedicated to the support of the particular agency involved.

STATE FUNDS - Includes all funds: General Fund, Highway Fund, and Special Fund.

ORGANIZATION OF NORTH CAROLINA STATE GOVERNMENT

NOTES OF EXPLANATION

1. The North Carolina General Assembly is divided into two houses—the Senate with 50 members and the House of Representatives with 120. The Lieutenant Governor is presiding officer of the Senate and is called the President of the Senate. The Speaker is the presiding officer of the House of Representatives and is elected by the representatives from among their members.
2. Legislators are appointed to one or more committees within their respective houses by the presiding officers of their house.
3. The President Pro Tempore of the Senate and the Speaker of the House serve on the Legislative Services and Legislative Research Commissions. They also appoint 5 members each from their respective houses to serve on the Legislative Research Commission and 6 each to serve on the Legislative Services Commission. The Legislative Services Officer is appointed by the Legislative Services Commission and provides administrative support to the Legislators.
4. The Governor and the other 9 elected officials of the Executive Branch form the Council of State. The heads—called "Secretaries"—of other executive departments are appointed by the Governor and serve at his pleasure.
5. The State Board of Education serves as "head" of the Department of Public Education. 11 of its 14 members are appointed by the Governor, subject to confirmation by the general assembly in joint session. The Lieutenant Governor, State Treasurer, and Superintendent of Public Instruction, who is secretary to the Board, are *ex officio* members. The Department itself is divided into two Departments—the Department of Public Instruction and the Office of the Controller. The Superintendent of Public Instruction is the administrative head of the Department of Public Instruction and is elected by the citizens of North Carolina. The Controller is appointed by the State Board of Education subject to the approval of the Governor.
6. The State Board of Community Colleges is the "head" of the Department of Community Colleges. 19 of its members are appointed by the Governor and 2—the Lieutenant Governor and State Treasurer—are *ex officio*. The State President of the Community College System is elected by the State Board and serves as the administrative head of the department.
7. The State Board of Elections is an autonomous agency whose members are appointed by the Governor. The Executive Director-Secretary is appointed by the board and with a supporting staff provides administrative services to the board and to the local boards of elections in the counties.
8. The Chief Justice of the Supreme Court designates one of the Judges of the Court of Appeals as chief judge. The Chief Justice also designates one of District Court Judges in each district as Chief District Court Judge.
9. The Administrative Office of the Courts provides administrative and research assistance to all levels of the Judicial System. The Administrative Officer of the Courts is appointed by the Chief Justice of the Supreme Court.
10. North Carolina is divided into 30 Judicial Districts. Several of the districts are further divided into "A" and "B" districts for administrative purposes.
11. District Attorneys serve as prosecuting officers at both the Superior and District Court levels. The Clerks of Court in each county also serve both courts.
12. Magistrates—1 or more in each county, are appointed for two-year terms by the Senior Resident Superior Court Judge in each district and serve under the supervision of the Chief District Court Judge in their respective Districts.

(a) Personal income is income before deduction of income and other personal taxes, but after deduction of social security taxes. It includes monetary and non-monetary income. Nonmonetary income covers "payments in kind," e.g., food, clothing, and lodging furnished by employers, "imputed" rent and "imputed" interest.

(b) Agriculture Fund discontinued as an operating fund after 1964-65 fiscal year.

* Poll tax discontinued effective July 1, 1972.

NOTE: License and excise stamp tax collections reported in year following year in which collected. Excise stamp tax on conveyances effective January 1, 1968.
Sharp annual changes in total sales tax revenue have occurred because of increases in the number of counties levying the tax.
Sales tax data are missing for years 1964-65 through 1967-68 because there were no revenue collections on the local level for those years.

(a) Exempt after 1957.

(b) Procedures for valuing public service companies changed and statutory definition of public service company or public utility broadened.

(c) Beginning January 1, 1974 all real and tangible personal property assessed at 100% of appraised value statewide.

NOTE: The term "corporate excess" is applicable only for fiscal years prior to 1972-73. The term applied to public service company property valuations certified to the counties and cities by the State. The amounts certified were the "excess" of the total company (unitary) value in North Carolina above the sum of the valuations of the company's property that was by statute subject to valuation by the counties.

(a) Includes state taxes and collections from the "five cents per bottle" price increase adopted to finance alcoholic rehabilitation centers and, for local governments which have approved the sale of mixed beverages, sales for resale as mixed beverages and collections of the $10 local tax.

(b) Collections based on sales made during the fiscal year. State tax collections for the fiscal year differ since taxes are remitted in the month following the month of sales.

(c) Amount shown is ninety percent of the collections from the local mixed beverage tax. The remaining ten percent is paid to the Department of Human Resources to finance alcoholic rehabilitation centers and research and education on alcohol abuse.

(d) Net profits for the units of government are profits after deduction of state taxes, the "five cents per bottle" collections, 10% of the local mixed beverage tax collections, cost of goods sold operating expenses, reserves for law enforcement and certain reserves for education or local schools. Most of the net profits are credited to the general funds of the respective local governments.

NOTE: Detail may not add to totals due to rounding.

(a) Includes state taxes, collections from the "five cents per bottle" price increase adopted to finance alcoholic rehabilitation centers and, for local governments which have approved the sale of mixed beverages, sales for resale as mixed beverages and collections of the $10 local tax.

(b) Collections based on sales made during the fiscal year. State tax collections for the fiscal year differ since taxes are remitted in the month following the month of the sales.

(c) Amount shown is ninety percent of the collections from the local mixed beverage tax. The remaining ten percent is paid to the Department of Human Resources to finance alcoholic rehabilitation centers and research and education on alcohol abuse.

(d) Net profits for the units of government are profits after deduction of state taxes, the "five cents per bottle" collections, (10% of the local mixed beverage tax collections) cost of goods sold, operating expenses, reserves for law enforcement and certain reserves for education or local schools. Most of the net profits are credited to the general funds of the respective local governments.

(e) ABC stores in the towns of Biscoe and Mount Gilead in Montgomery County are operated as a single local system.

Section 9

Employment and Income

EMPLOYMENT AND INCOME

GLOSSARY

CIVILIAN LABOR FORCE - The total number of employed and unemployed persons, excluding military personnel.

EMPLOYMENT - All persons who worked for pay or profit, or worked without pay for 15 hours or more per week in a family farm or business.

INSURED EMPLOYMENT - Includes those employed by firms subject to the N.C. Employment Security Law. This employment is estimated to represent 90 percent of the total nonagricultural employment in the State. Excluded from coverage are workers on small farms, certain domestic service in private homes, religious and charitable organizations, interstate railroads, family workers, and the self-employed.

MONEY INCOME - Includes wage and salary income, net nonfarm self-employment income, net farm self-employment income, Social Security and railroad retirement income, public assistance income (cash payment), and all other money income received before deductions for personal income taxes, Medicare deductions, etc.

PER CAPITA MONEY INCOME - Is computed by dividing the aggregate money income of all persons by the total population.

PER CAPITA PERSONAL INCOME - Equals total personal income of all persons divided by total population.

PERSONAL INCOME - Consists of private and government wage and salary payments in cash and "in kind" (e.g. food, clothing, or lodging furnished by employers), other labor income, farm and nonfarm proprietors' income, interest, rent, dividends, and transfer payments, less personal contributions for Social Security. It is measured before the deduction of personal income taxes.

POVERTY LEVEL - A person or family is classified as being above or below the poverty income level according to a definition of poverty income level originated by the Social Security Administration in 1964 and subsequently modified by a Federal Interagency Committee in 1969. At the core of this definition is a nutritionally adequate food plan ("economy" plan) designed by the Department of Agriculture for "emergency or temporary use when funds are low." This index provides a range of income cutoffs or "poverty income thresholds" adjusted by such factors as family size, age of the family head, and number of children under 18 years. These income cutoffs are revised annually to allow for changes in the Consumer Price Index.

UNEMPLOYMENT - All persons who did not work at all during the week of the estimate but were able, available, and looking for work. Includes all jobless persons looking for work, regardless of whether or not they qualify for unemployment insurance benefits.

(a) The family consists of an employed husband, age 38, a wife not employed outside the home, an 8-year-old girl, and a 13-year-old boy.

(b) Total budget costs include personal income taxes, social security, other items and total consumption.

(c) Housing includes shelter, housefurnishings and household operations.

(d) Renter costs include average contract rent plus the costs of required amounts of heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.

(e) Homeowner costs include interest and principal payments plus taxes; insurance on house and contents; water, refuse disposal, heating fuel, gas, electricity, and specified equipment; and home repair and maintenance costs.

(f) The average costs of automobile owners and nonowners in the intermediate budget were weighted by the following proportions of families: Boston, New York, Chicago, and Philadelphia, 80 percent for owners, 20 percent for nonowners: Baltimore, Cleveland, Detroit, Los Angeles, Pittsburgh, San Francisco, St. Louis, and Washington, D. C. with populations of 1.4 million or more in 1960, 95 percent for automobile owners and 5 percent for nonowners; all other areas, 100 percent for automobile owners.

(g) In total medical care, the average costs of medical insurance were weighted by the following proportions: 30 percent for families paying full cost of insurance; 26 percent for families paying half cost; 44 percent for families covered by noncontributory insurance plans (paid by employer).

(h) Other family consumption includes the average costs for reading,recreation, tobacco products, alcoholic beverages, education and miscellaneous expenditures.

(i) Places with population of 2,500 to 50,000.

NOTE: Autumn 1978 was the last time comparative costs for Durham, N.C. were reported. The Bureau of Labor Statistics eliminated the family budgets program after release of the Autumn 1981 report due to federal budget reductions.

Business and Industry

BUSINESS AND INDUSTRY

GLOSSARY

GROSS RETAIL SALES - Total retail sales (taxable and non-taxable) reported to the North Carolina Department of Revenue by businesses for State sales and use tax purposes. Includes receipts from some services, for example, hotel and motel room rentals and laundry and dry cleaning services. Also includes receipts from rentals of tangible personal property.

TRAVELER - The broad term traveler or tourist includes persons going outside their daily commuting zones. State residents traveling on trips away from home are included in the total, along with out-of-state visitors. The estimates include persons traveling for business, pleasure, and personal affairs. Also included are travelers passing through en route to destinations beyond, and parties making short trips, such as weekend or holiday visits. One-day as well as overnight trips are included. Regular commuters are not included.

VALUE ADDED BY MANUFACTURE - The value created by the transformation of materials into a finished product.

(a) 1982 Fiscal Year (July 1 through June 30).

NOTE: The estimated expenditures for 1980 and 1981 are on a different basis and cannot be usefully compared with earlier years. The allocation is based only on hotel and motel receipts, it does not reflect differences among the counties in recreation and amusement attractions nor in seasonal and vacation rental properties. Due to rounding off of dollars, figures may not total.

(a) Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated.

(b) Including central administrative offices and auxiliaries.

(c) Aggregate of cost of materials and value of shipments for industry groups (2- and 3-digit) and for all manufacturing industries includes extensive duplication, since products of some industries are used as materials by others.

(d) Withheld to avoid disclosing figures for individual companies.

(Z) Less than one-half of the unit of measurement shown.

(a) Includes total domestic and export shipments for all manufacturing establishments.
(b) Includes only the value of manufactured products exported by the producing plants.
(c) Includes shipments of components, parts, supplies, etc., used by plants producing the export product. Supporting shipments were estimated for the 51 Bureau of Economic Analysis (BEA) input-output industries, allocated to States and aggregated into State Standard Industrial Classification (SIC) totals.
(d) Total export related shipments are the sum of the two immediately preceding columns.
(e) Includes employees of central administrative offices (CAO's) and auxiliaries (warehouses, garages, repair shops, etc.) serving operating manufacturing establishments.
(f) Employment is limited to paid employees in manufacturing plants producing the export product. The number of employees related to export shipments was calculated for each establishment, aggregated by industry and by States, and inflated to a level comparable to the plant value of exports reported in the official foreign trade statistics at port value.
(g) Manufacturing employment at establishments producing components, parts, supplies, etc. for use by plants producing for export. The employment was estimated for 51 Bureau of Economic Analysis (BEA) input-output industries, allocated to States, and aggregated into State Standard Industrial Classification totals. This column also includes an estimate of 190.8 thousand employees in central administrative offices and auxiliary units that service manufacturing establishments.
(h) The employment totals shown are the sum of the two immediately preceding columns.

Agriculture

AGRICULTURE

GLOSSARY

FARM - The current definition of farm was announced on August 12, 1975. It defines a farm, for statistical purposes, as any place from which $1,000 or more of agricultural products were sold or normally would have been sold during the census year. The previous definition (used for the 1959, 1964, and 1969 agricultural censuses) counted as a farm any place with less than 10 acres from which $250 or more of agricultural products were sold or normally would have been sold during the census year, or any place of 10 acres or more from which $50 or more of agricultural products were sold or normally would have been sold during the census year.

GOVERNMENT PAYMENTS - Government payments to farmers made directly to farmers in connection with farm programs.

GROWING STOCK - Sawtimber trees, poletimber trees, saplings, and seedlings; that is, all live trees except cull trees.

SAWTIMBER - Live trees of commercial species nine inches and larger in diameter at breast height for softwoods and eleven inches and larger in diameter at breast height for hardwoods, and containing at least one saw log.

(b) Nights spent in state.
(c) Includes total nights spent on trip, not just nights spent in state.
(d) Apparent inconsistency between figure for household trips and that for person-trips is because the two kinds of trips were weighted independently.
(z) Less than one-half the unit of measure.

- Represents or rounds to zero.

(a) Ton-miles are the product of weight times distance on a straight-line distance basis.

(b) Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. Figures for 1977 were calculated from summary data.

(c) For 1967 and 1972, shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. For 1977, local shipments were included, all modes of transportation were included, 50 states and D.C. were included, and data on value of shipment were compiled.

(d) Distances of shipments to foreign destinations are calculated only to the U.S. port of export. "Mileage Unknown" was excluded from total in calculating percentages.

(a) Before Tax Accruals and Net Rent.
(b) Includes Franchise Tax.

NOTE: Effective 1/1/78, Class I & II railroads began recording their operations in conformance with the revised Uniform System of account, resulting in expense reclassifications which affected the net revenue and the operating ratio. This change is reflected in the 1978-1980 period; 1977 and prior was not restated to reflect the changes.
